

*the pressure vessel
manufacturing company*

about us:

TBT Tanbkbau Technik is a Company which is headquartered in Istanbul/Turkey since 2013. Our company is predominantly represented in Vessel and Tank manufacturing.

TBT produces vessels of all kinds and offers you for all requirements the appropriate vessel with the relevant approvals.

Due to our longstanding experience in the pressure vessel and Equipment construction, we are a competent partner for your requirements.

As a certified Welding Company according to EN ISO 3834-2/AD 2000- HP 0 / PED ,DGRL 2014/68/EC we design and manufacture pressure vessels according to Pressure Equipment Directive 2014/68/EC and AD 2000 Code. Our team of engineers plans, designs and calculates your projects with our professional knowledge and the most modern data technology.

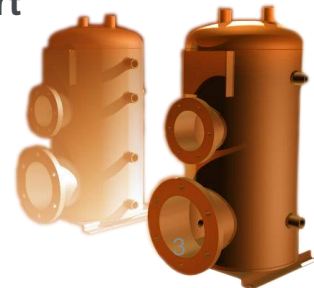

about us:

All standard welding processes are used in our production. As a part of the vessel and equipment construction, primarily we use the reliable SAW method (Column Boom System), all of our welders and operators are certified according national and international regulation and standards.

Non-destructive tests like VT, PT and UT are performed by our own staff, which is approved according to EN and ASME codes. We design and manufacture

Our business partners receive a complete service from us - from planning up to commissioning. Customer satisfaction is the most important step. Due to our long experience and our well-skilled staff, we offer a competent partner who will support you in your projects.

Furthermore, our team is very flexible and solves problems immediately. We work on short ways and offer you a high quality. As our customer, you will benefit from our expert knowledge and our experience to manage projects fast and successfully.

serial products, made by carbon- and stainless steel

- pressure vessel and equipments
- Filter vessel
